

Rules: Ages 1-10

Contest Rules, Ages 1-10

- Each team (4 people max) will be given 500 KEVA Planks to build the tallest structure they can while including the topper tent provided with the KEVA Planks. While the topper tent does not have to balance on the top, the further the topper tent is from the base, the more points the team will receive. The topper tent must be touching one of the Keva planks to receive points.
- Teams may use up to, but no more than, 20 minutes to build their complete structure. If a structure breaks or falls during the time limit, the team is encouraged to rebuild the structure until time is called.
- No additional tools or building aids may be used in the building area.
- Each team will be given an area approximately 5x5 feet and no team members may cross into another team's area.
- Teams may not throw, slide, toss, propel, launch, or drop objects, including planks or the topper tent into another team's space.
- Participants may be videotaped or photographed throughout the event.
- Teams may topple or disassemble their own structures after all of the results are reported and the judges determine it is safe to do so.

Judging: Scored by Height

- Building is complete when the team runs out of planks, 20 minutes has passed, or when the team decides to stop building. Judging begins after the 20 minutes have passed.
- The order in which the structures are judged is at the judges' discretion.
- Each team will receive a score based on the final measurements of their construction based on the formula: maximum height (perpendicular to the floor), multiplied by the distance between the center point on the floor and the top of the topper tent.
